Profile

Passionate and detail-oriented Front-End Developer with hands-on experience in building responsive and modern web applications. Proficient in HTML, CSS, JavaScript, and React, with practical knowledge of Tailwind CSS, Bootstrap, Strapi, and Firebase. Skilled in creating clean and efficient UI components, integrating APIs, and delivering smooth user experiences. Eager to contribute to real-world projects and continuously grow within a collaborative development team.

Projects

POS | Point of Sale Web Application

- Developed a full-featured POS system using React and Bootstrap for the frontend and Strapi as the backend and admin dashboard.
- Implemented **user authentication (login system)** to ensure secure access.
- Integrated product listing with the ability to **add items to a shopping cart** and manage cart contents.
- Enabled **sales invoice generation** with real-time printing support.
- Stored all order and invoice data in Strapi, allowing for persistent data management.
- Built a **date-based filtering** system for viewing past invoices efficiently.
- Ensured seamless synchronization between frontend actions and backend storage using RESTful APIs.
- Github : <https://github.com/MahmoudNassim/POS-Resturant->

FOODOTA | A restaurant product listing and ordering web platform

- Built a responsive front-end interface using **Tailwind CSS**, allowing users to browse and order food products from various restaurants.
- Integrated with **Strapi CMS** to manage restaurant data, product listings, and customer orders dynamically.
- Implemented a functional **shopping cart** feature where users can add products and place orders seamlessly.
- Focused on clean UI/UX to enhance the customer experience and simplify the ordering process.
